

NASTRO CLIMA

DESCRIPTION:

Cross-linked polyethylene foam resin adhesive band for air-conditioning systems.

USE:

Apply the band on a degreased and dry surface. Wind up the band around the tubes overlapping 20 % to 50 % according to the thickness required. Remove the protection film while applying the insulating band.

TECHNICAL DATA

Colour	light grey
Polymer	cross-linked polyethylene foam
Density	ISO 845 0,30 g/cm ³
Coefficient of thermal conductivity @ 40 °C	UNI 7745 W/mK 0,037
Reaction to fire class	CSE RF2/75 °C RF3/77 C1
Water vapour permeability	DIN 52616 ng/Pa s m 0,12
Water vapour diffusion resistance coefficient	m 12000
Thickness	3 mm
Width	50 mm
Maximum operating temperature	-40 °C ÷ +80 °C
