

SILIT

DESCRIPTION:

Water repellent composed grease added with silicones.

CHARACTERISTICS:

Oxidation resistant and corrosion proofing; hot and cold waterproof. It does not emulsify with water and resists to medium temperatures.

APPLICATIONS:

For the greasing of bearings working inside furnaces, driers, stoves and ventilators. For a permanent lubrication of valves, taps, pumps, compressors, meters, stuffing boxes, etc.

INSTRUCTIONS FOR USE:

Apply by means of a spatula or of a special lubricator. Good pumpability.

TECHNICAL DATA:

Appearance	smooth-textured straw
Odour	characteristic
Water solubility	insoluble
Density	0,95 ± 0,01 g/ml
Penetration (ASTM D 217 @ 25 °C)	265 ÷ 295 mm/10
Dropping point (ASTM D 566)	150 ÷ 170 °C
