

# CLIMATAB

## DESCRIPTION:

Sanitizing tablets suitable for the prevention and elimination of phenomena of decay and formation of algae, silt and harmful bacteria that might clog the collection trays and fully occlude the drain pipes of the air conditioners. Controls the growth of algae, reduces the bacterial load to its broad spectrum biocide acting effectively even on Legionella Pneumophila and Pseudomonas Aeruginosa, also it prevents the formation of mucilage also harmful for the battery performance laminated.

**Manufactured in accordance with the Law 155 on HACCP.**

## INSTRUCTION FOR USE:

Place a tablet in the duct of the fan-coil in the tank or containment of the split condensate at the point farthest from the exhaust. The duration depends on use, but normally is about one - two tablets every 15 to 20 days for units up to 12.000 BTU.

## TECHNICAL DATA:

Appearance	solid tablets
Color	white
Odor	mint
Relative density at 60 °C	965 ± 5 g/l
Weight tablets	about g 6/cad
pH sol. 1 %	7,6 ± 0,5
Active principle	10 %
Water solubility	partial
Flash point	non flammable

Store in original containers in a cool, dry area. Do not expose to direct sunlight. Keep the containers closed when not used.

## PACKAGING:

Blister 8 tablets, box of 12 pieces.
