

DECANOX GEL

DESCRIPTION:

Gel for pickling stainless steel surfaces, particularly suitable to remove the oxides, the opacity and the carbonaceous residues formed during welding.

HOW TO USE:

Mix the contents with a stick or plastic brush, spread a layer of product over the weld with an acid brush, leave for as long as necessary.

Rinse thoroughly with water.

Welding electrode will be convenient to brush with a stainless steel brush to remove debris deposited.

TECHNICAL DATA:

Appearance

colorless paste

Odor

characteristic pungent

pH

< 1

Density

1,200 ± 0,05 g/cm³

Water solubility

complete

Corrosive product.

PACKAGING:

Pails of 1 Kg, boxes of 12 pieces.

Last update: 03.04.2023
