

DISSOLINA

DESCRIPTION:

Anti-calcareous scales remover powder for the cleaning and removal of calcareous scales. Suitable for wash basins, bathtubs, toilets, boiler coils, coffee machines, etc.

CHARACTERISTICS

Semiacid powder which, once dissolved into water, makes calcareous scales soluble. It does not exhale fumes and/or acid or toxic odours. It gives very good results even without high levels of pH.

INSTRUCTIONS FOR USE

When using it on glazed cast iron bathtubs do not leave the pure product in contact with surfaces for a long time in order to prevent corrosion; use only on lime. It can be used on a humid sponge to remove lime from taps and bathroom fixtures. Then wash with plenty of water. As regards mixers, radiators, coils and coffee machines, make a solution at 5 % -10 % checking every 3 - 5 minutes if the effervescence has disappeared. Suitable for stainless wash basins, too.

WARNINGS

Do not store in humid places and keep out of children's reach. When ingested, the product is toxic. It has an irritant action on eyes and on skin.

CHEMICAL AND PHYSICAL CHARACTERISTICS:

Aspect	Crystalline solid powder
Colour	White
Odour	Not relevant
Melting point	205 °C
Specific weight	1,25 g/cm ³
Water solubility	Total
pH	1,2 (solution at 10 g/l in water @ 25 °C)
