

MUFFANET

DESCRIPTION:

Sodium hypochlorite-based detergent suitable for the instant removal of mould, algae, moss and bacteria as well as viruses and unpleasant odours from damp indoor and outdoor areas such as: bathrooms, showers, WCs, cellars, kitchens, saunas, whirlpools, swimming pools, flowerpots, surfaces not sensitive to active chlorine.

DIRECTIONS FOR USE:

Remove coarse layers of mould with a scraper, apply the spray bottle, spray evenly over the surface to be treated and then after a few moments, rinse thoroughly. If necessary, repeat the treatment after a few minutes.

GUARANTEED VALUES:

| MEASUREMENTS | UNITS OF MEASUREMENT | VALUES | ANALYSIS METHOD |
|---------------------------------|----------------------|--------|------------------------|
| Titre (active chlorine volumes) | % | 3 | R-UE 30 ⁽¹⁾ |
| Residual alkalinity (NaOH) | g/Kg | 5 max | R-UE-31 ⁽¹⁾ |

OTHER CHARACTERISTICS (typical average values):

| | | | |
|---------------------------------|------|---------------|------------------------|
| Appearance | | Clear | |
| Density | g/ml | 1.050 – 1.150 | R-UE-28 ⁽¹⁾ |
| Total chlorine | g/Kg | 25.2 max | R-UE 29 ⁽¹⁾ |
| Active chlorine | g/Kg | 24.2 max | R-UE-30 ⁽¹⁾ |
| Na ₂ CO ₃ | g/Kg | 4 max | R-UE 32 ⁽¹⁾ |
| Iron | ppm | 1 max | R-UE-33 ⁽¹⁾ |
| Total Mercury | ppm | 0.05 max | R-UE 34 ⁽¹⁾ |

⁽¹⁾ = method of analysis mentioned by the manufacturer.

OTHER DATA AND WARNINGS:

Active chlorine 3 %. Useful content for 2 - 3 m² wall, 6 - 8 m² of floor.

Irritating to eyes, respiratory system and skin. Do not put in contact with acids. Work in well ventilated areas. For further information ask for the safety data sheet. Store away from light and heat.

N.B. The product is included in the list of BIOCIDES products under registration with ECHA according to BPR Regulation (EU) 528/2012.

EFFECTIVENESS:

Muffe

Batteri

Virus
