

MULTIUSE GREASE (LITHIUM-BASED)

DESCRIPTION:

MULTIGREASE is a lithium soap-based grease of UNIVERSAL USE able to satisfy different needs both as for the type of component to be lubricated and for the use conditions.

The main properties of the Lithium-based Grease are the following:

- Heat resistance even when the temperature of the lubricated component reaches 160 °C;
- Mechanical stability even in the presence of vibrations;
- Waterproof;
- Corrosion proofing;
- Good pumpability.

The Lithium Grease is prepared with additives giving it a good adhesive power.

APPLICATIONS:

Manual lubrication by means of a tekalemit pump; suitable for gears inside carters.

TECHNICAL DATA:

Appearance	thick paste
Colour	blue - green
Odor	typical
LNG 1 rating	2
Kind of soap	Lithium
Flash point	> 250 °C
Relative density	0,900 ± 0,005 g/cm ³
Dropping point ASTM D 566	187 °C
Worked penetration @ 25 °C, ASTM D 217	275/10 mm
Water solubility	not soluble

Packages available: refer to the current price list.

PACKAGING:

Tube 100 gr.
Bombs spray 400 ml.
