

# NAUTICHEM

## DESCRIPTION:

Liquid anti-bacterial and odor neutralizer for foul-smelling discharge.

## INSTRUCTIONS FOR USE:

NAUTICHEM is a revolutionary product with great effectiveness that can break down and sanitize the animal and human sewage in chemical toilets for campers, caravans, boats, construction sites, etc. NAUTICHEM is able to eliminate the unpleasant odors, to reduce the formation of gas and prevent the fouling by deposits on the inner surface of the waste water tanks.

## CHARACTERISTICS:

The product gives a net power sanitizing, deodorizing and thinning to stop stinking sewage drains. NAUTICHEM is a viscous liquid and its action is fast and radical when used at recommended concentrations.

## RECOMMENDED DOSES AND METHOD FOR USE:

To get a proper disinfection of the chemical toilet, the determination about 100 - 150 ml of product to 20 liters of capacity of the tank, then add about 3 liters of water to help the dissolution and ensure an optimal operation of the toilet; subsequently emptying the discharge tank allowed only in places such as rest areas equipped, camper service, camping, equipped ports etc and rinse thoroughly with clean water.

In case of using NAUTICHEM to eliminate odors, measure about 50 to 100 ml in 10 liters of water, mix well and pour the solution into the grids smelly.

## TECHNICAL DATA:

Appearance	viscous liquid
Color	blue
Odor	characteristic
pH	6 ± 0,5
Density at 15 °C	1,028 g/cm <sup>3</sup>
Density at 25 °C	1,020 g/cm <sup>3</sup>
Flash point	not-inflammable
Water solubility	complete

## PACKAGING:

Bottles of 1 liter. We recommend that you always close the package after each use.

## INGREDIENTS:

Aqua, Glutarale, Methyl Alcohol, Cocamide Dea, Alcol Etossilato, Cocamido Propylbetaine, Dimetiladipato, Dimetilglutarrato, Dimetilsuccinato, 2-Bromo-2nitro-1,3-propandiolo, Mixed Terpenes, Parfum, dyes.
