

ACTI SURFACE+

Ready-to-use cleaning and disinfecting solution for hard surfaces

Contain Didecyltrimethylammonium chloride (0,3 g / 100 g)

Bacteria

Enveloped viruses

Hefen

Medical and Surgical Facility – Ministerial Authorization N° 21005

DESCRIPTION:

Ready-to-use disinfectant and cleaner for hard surfaces; eliminates 99.9% of enveloped viruses, Gram-positive and Gram-negative bacteria, yeasts, and fungi.

Disinfected surfaces that will come into contact with food must be rinsed with potable water before use. Fragrance-free and colorless.

BENEFITS:

- Specifically designed for use in the food industry / HACCP and healthcare sectors (cosmetics, pharmaceuticals, and medical fields) where high hygiene standards are required; it is also useful in industrial settings, such as for disinfection in the food industry (restaurants, bars, hotels, delis, and production facilities), as well as other industrial areas.
- Useful in offices and institutional settings (schools, offices, gyms, and other facilities).
- Also suitable for household use (in the kitchen: sinks, countertops, floors, and other household surfaces).
- Not classified as corrosive or hazardous to the environment in accordance with EC Regulation No. 1272/2009.
- Not subject to ADR regulations.

DIRECTIONS FOR USE:

ACTI SURFACE+ can be applied directly to surfaces using a cloth, or by spraying or misting.

Contact times for optimal effectiveness:

- Bactericidal (5 minutes)
- Fungicidal and virucidal (15 minutes)

TECHNICAL DATA:

Appearance

clear, transparent liquid

pH

9.75 to 10.25

Solubility in water

complete

Relative density @ 20 °C

1 ± 0.02 g/ml

Shelf life

24 months
