

# GERMOKIL 10X

**Highly concentrated detergent, formulated with powerful antibacterial, delicately scented, to be used for domestic, civil and sanitary use**

## DESCRIPTION:

Powerful highly concentrated detergent, ideal for any washable surface in domestic, community, civil and industrial environments. Formulated with a biocidal active ingredient based on Benzalkonium Chloride, it also guarantees excellent cleansing thanks to the presence of a mix of surfactants and allows for an antibacterial action by preventing fermentation that causes bad odors. In addition, thanks to the presence of natural essences, it leaves the rooms pleasantly scented, making GERMOKIL 10X particularly suitable for the Ho.Re.Ca sector, it is also indispensable in food industries, communities and wherever the use of bacteriostatic products is required. Finally, suitable for sanitizing and cleaning the vents of whirlpools and saunas, for more information on dosages and contact times consult the technical data sheet.

## HOW TO USE:

For the antibacterial prevention and sanitization of tiles, sinks, bathrooms, flooring, extractor hoods, industrial filters, tarpaulins, enameled and stainless steel appliances, hard surfaces in general, use 60 – 90 ml of GERMOKIL 10X per 5 liters of water. For an energetic action and deep cleaning of sensitive points such as waste collection bins or simply handles and door bars, buttons, light or elevator switches, etc., use the product at the rate of 1 liter for every 5 liters of water. In cases of stubborn dirt, the product can be used as is, using a damp cloth. Avoid combining with anionic products and soaps.

## COMPOSITION:

- Essences and water
- Non-ionic adjuvants and detergents
- Benzalkonium Chloride

## WARNINGS:

Store out of reach of children.

Store away from food or feed and from drinks.

Do not contaminate food, beverages, or containers intended to contain them during use.

Do not swallow.

In case of contact with eyes, wash immediately and abundantly with water.
