

WARNING BAND

With 2 stainless steel wires

DESCRIPTION:

Warning bands with indelible writings “Warning water pipe” and “Warning gas pipe”, provided with galvanized steel or stainless steel wires, suitable for the detection of underground pipelines and pipes made of polyethylene and/or non-metallic materials. The use of these bands avoids any possible damage to pipes when further digging operations have to be carried out, since they signalize their presence. They are made of low-density polyethylene and are available in different colours according to the different use.

DESCRIPTION AND TECHNICAL FEATURES:

Polyethylene tape printed on one side with a marking ink, resistant to diluted chemical products and to atmospheric agents coupled with a transparent polyethylene film with 2 stainless steel wire inside.

Thickness of base material	low density polyethylene th. 100 My
Transparent material	polypropylene th. 30 My
Adhesive	acrylic
Stainless steel wires	Aisi 304 th. 0,4 mm
Total thickness	0,15 mm
Elongation stainless steel wires	25 %
Height of the tape	50 mm – 100 mm
Length of the tape	150 ml
Colours	light blue, yellow, red

PACKAGING:

Boxes of 4 rolls of 150 m length.
