

THERMONET FLUE GAS

DESCRIPTION:

Detergent scale remover for boiler combustion chambers.

Concentrated product, studied to easily remove sooty deposits and incombustible deposits from the flue gas side of heat exchanger surfaces in heating appliances.

INSTRUCTIONS FOR USE:

When sprayed on the boiler surfaces THERMONET FLUE GAS immediately reacts developing effervescence and neutralizing the deposit acidity. Waste is dissolved and softened so that during the following boiler start-up deposits totally come off the surfaces clearing the exchanger from obstructions hence optimizing consumptions. Once the operation is complete, we recommend abundant washing with water, preferably with a pressure jet. It is then recommended to protect and passivate the treated surface (in the case of aluminium or its alloys) using THERMOSAN-BL.

TECHNICAL DATA:

Appearance

liquid

Color

yellow

Odor

characteristic

pH

12,0 ± 0,2

Relative density

1,050 ± 0,010 g/cm³

Dry residue % @ 105 °C

19,4 ± 1

Water solubility

complete

PACKAGING:

5/10 kg tanks.

INGREDIENTS:

Aqua, Tetrasodium EDTA, Sodium Hydroxide, Acido Alchilbenzensolfonico, Butoxyethanol, Sodio Alchiletere Solfato.
